Matthew Grygar

I understand people and technology.

I add the most where technical understanding has to meet the ability to lead people and projects. I turn ideas into clear plans, and plans into working solutions.

10 years in theatre taught me professional communication and presenting.

130+ players took part in the Grail Series tournaments I organised.

300+ terminals of parcel lockers whose operation I coordinated.

550,000+ people passed through the National Vaccination Centre while I was helping run its IT operations.

Work experience

2025

Jan 2025 – present

Trask ■ current

System Engineer

Running and developing enterprise IBM solutions in banking. Identity management, document systems, incidents and operational changes.

DMS / MONETA · Apr 2026 – present

- IT Operations & Incident Management – resolving operational incidents and requests, analysing problems and coordinating fixes across technical teams.
- Change Management – coordinating operational changes, environment updates and related work with development and other specialists.

IT Operations | Incident Management | Change Management | IBM Db2 | Red Hat Enterprise Linux | Stakeholder Communication

IDM / ČSOB · Jan 2025 – Mar 2026

- IBM IAM infrastructure – installing, configuring and upgrading IBM ITIM, ISVG, Db2, LDAP and WebSphere Application Server.
- Requirements analysis and consulting – working with customers and developers, clarifying needs and co-writing functional and technical specifications.

Identity & Access Management | IBM Security Verify Governance | IBM ITIM | LDAP | IBM Db2 | WebSphere

2024

Feb 2024 – Sep 2025

OX Point

Senior Application Support Specialist

Application operations and technical support for a network of more than 300 parcel lockers. Coordinating incidents and technical teams, developing operational processes.

- Incident and Service Management – leading P1 / major incident resolution, running crisis calls, escalations and service recovery, including on-call duty.
- Designing support processes – creating a multi-level L0–L3 support model with responsibilities, competencies, SLAs and escalation paths, partly put into practice.

2022

Nov 2022 – Mar 2024

NAKIT

Application Operations Specialist → Senior IT Platform Specialist

Running the Citizen Portal and its related sign-in services. From application support to managing major operational incidents.

Senior IT Platform Specialist · May 2023 – Mar 2024

- Major Incident Management – leading P1 incident resolution, running crisis calls, setting priorities and escalating issues.
- Coordinating teams and partners – managing communication between technical specialists, suppliers and management, tracking progress and chasing the necessary steps.

Major Incident Management | IT Operations | SLA Management | Stakeholder Communication | Service Monitoring

Application Operations Specialist · Nov 2022 – May 2023

- L2 application support – resolving requests from end users and institutional customers, diagnosing Citizen Portal errors and sign-in problems.
- Server infrastructure – operating Windows Server and Linux environments, working with SQL databases and related systems.

L2 Application Support | Windows Server | Linux | SQL | IT Service Management

2021

Dec 2021 – Nov 2022

MyCom Solutions

IT Infrastructure Specialist

IT outsourcing for business customers and infrastructure projects from design to handover.

- Delivering network projects – running contracts from understanding the customer's needs, technical design and the quote through to delivery and handover.
- Leading technical delivery – independently managing a structured cabling project of roughly 10 km, including organising the work and coordinating the technicians involved.

IT Infrastructure | Project Coordination | Team Leadership | Ubiquiti | Fortinet

2021

Feb 2021 – Dec 2021

National Vaccination Centre ÚVN – O2 universum

IT Operations Consultant

Running the vaccination centre's workstations, devices and database through 131 days of crisis operations.

- Leading and coordinating the IT team – organising shifts and assigning tasks and responsibilities in a team of six, working with external specialists.
- IT infrastructure and support – preparing and running dozens of devices and workstations, resolving technical incidents on the spot.

IT Operations | Team Leadership | MS SQL | Incident Management | Application Testing

Side projects

Grail Series

A tournament series for the Czech Duel Commander community – concept, partners and running the events. Over 130 unique players have taken part.

MtG DC ELO Ranking System

A web app with an ELO ranking for the same community – product, data and frontend. Over 430 players are in the ranking.

Education

VŠB – Technical University of Ostrava, Faculty of Safety Engineering
Technical protection of people and property
2023 – 2025

Gymnázium Čelákovice
Eight-year grammar school
2010 – 2018
